

# Revit® MEP Advanced

**Objective:** Gain a better understanding of the concepts and principles of building design using Revit® MEP. Learn the fundamental features of the program, then progress through schematic design, system analysis and construction documentation and finish with design visualization. This course will help develop real-world engineering and design techniques for the student.

**Course Length:** 2 days (16 hours)

## Day 1

- Working with Detail Components
- Sharing your Design Using DWF
- Working with Clients Using DWG files
- Working with Clients Using Revit Architecture and Revit Structure

## Day 2

- Multi-User Worksharing
- Creating a Revit Master Template File
- Family Creation - The Basics

- Lunch is included when training at our facility.
- Class is from 8:30 a.m. to 4:30 p.m.
- Students will receive a certificate upon completion.
- After completion of an entire class, students may audit the same class for one year, if space is available in the class.
- Attend the class in person at our training center in Atlanta or virtually from anywhere in the world via the internet

### Advantages to Training at Repro Products' Autodesk® Authorized Training Center:

- Learn from our Autodesk Certified instructors at our superior facilities.
- Receive Autodesk® recommended content from Autodesk® Official Training Guides.
- Get your hands on sample projects and exercises that emphasize real-world application.

**Prerequisites:** Revit® MEP Fundamentals and a working knowledge of Microsoft operating system.

**Call 678-640-9965 to schedule your training.**
